# 📘 Project Title: Stock Portfolio Tracker

## 📝 About the Project:

This project helps you keep track of your stock investments. You can see how much your stocks are worth, check if you're making a profit or loss, and view price changes over time.

### 🔧 Tools Used:

- **Python** – the main programming language

### ⭐ Main Features:

- Add or remove stocks from your list
- See current stock prices
- Check total value of your portfolio
- View profit/loss
- See graphs of stock performance

### ▶️ How to Use:

1. Install the required Python libraries
2. Run the Python file
3. Enter your stock details when asked
4. View your portfolio and graphs

### 🚀 Future Ideas:

- Save your portfolio data
- Add login system
- Use more data sources
- Make a mobile version
